PROFESSIONAL EXPERIENCE

- I am a Freelancer Full Stack Developer. My portfolio reflects a medley of impactful projects, from crafting engaging user interfaces to architecting robust backend systems.
- More than 4 years of experience in front-end and back-end.
- [Participation in DevFest Mansoura Hackathon 2023.](#)
- Building many websites using JS, React js, PHP, and Laravel.
- Dealing with APIs in Different fields such as Quran API, Weather API, Media API, and others.
- Working with the React-i18next library to convert the website to more than one language [INGlobe International](#).

- **MAG Downloader:**

Through it [MAG Downloader](#), you can Download any video from Facebook, YouTube, Instagram, and Twitter (X), and it is also available to download in video or audio format from YouTube and images from Instagram. It can also work as an app that you can download from the website, and all of this will be in Arabic and English.

- **Quran Mail :**

Use Corn Job on the [Quran Mail](#) website to send a verse from the Quran with interpretation every day via Gmail using PHP and MYSQL.

- **MAG Posts :**

Throughout my career, I worked on Laravel projects, as work on a website ([MAG Posts](#)) can create an account on the website and post many posts and it appears to other users and you can edit or delete the post.

- In my **graduation project**, I worked on a medical reservations project that allows the doctor to register his data and his clinic's data, helps the patient reach the specialty and from there to the doctor, and facilitates the reservation process by sending a confirmation message after booking and showing a reservation schedule for each doctor.
- You will find all of these projects on the My Projects page in [My Portfolio](#).

Web Development Instructor For Udemy

- The beginning was with a course [The Complete HTML & CSS Course and Projects](#) which consists of explaining the basics of html, CSS, and CSS Advanced, with application to two Project.

Web Development Instructor For Youtube ([DEV HUB](#))

- The beginning was with the [Progressive Web Applications \(PWA\)](#) course, which is used to convert the website into a mobile and desktop application and run them offline, meaning without the need for the Internet.
- Secondly comes the course ([Javascript ما وراء الـ Javascript](#)), which is a series of different topics in JavaScript with a summary of them.

Web Development Internship For CodSoft and CodeAlpha

- I have completed my training in web development with certification in the Certification Section after completing several projects and delivering them on time.
